ELITE SECURITY SERVICES

>> PROTECTING YOUR CONSTRUCTION SITE
AND OPTIMISING YOUR PRODUCTIVITY

The best construction site security does more than prevent theft or vandalism. It protects your project momentum and ensures predictable progress. To achieve this, you need the sharpest technology, combined with real Human Intelligence. Since 2009, MAVE has worked with leading construction companies to keep businesses safe and eliminate inefficiencies.

As specialists in construction and infrastructure optimisation, we understand the true cost of poor security goes beyond replacing lost or stolen materials. It disrupts operations, delays projects, demoralises workers, and can even lead to fatalities. With the most advanced security technology and a uniquely tailored approach, our consultants work closely with you to protect and optimise your site with precision, flexibility and intelligence.

Our mission is to help you operate the safest, most efficient construction business to power your progress and secure your next project. Because true protection isn't just about what you prevent. It's what you enable.

Weak security is your biggest threat_

10.01

**A RISK YOU CAN'T
AFFORD TO IGNORE**

The challenges of the construction industry are growing. From declining project values to rising material and labour costs, weak security only makes things harder. It puts your margins, progress, and – worse of all – your people's safety at risk.

In the last five years, construction worker fatalities have soared by 70%, making better safety a non-negotiable. Theft and vandalism are also rising. With all these pressures, failing to have the right security isn't just a minor issue – it's a major liability.

10.02

**SECURE YOUR SITE,
SECURE YOUR SUCCESS**

At MAVE, construction security is a strategic priority, not an afterthought. Our frictionless solutions go beyond asset protection to make life easier for both you and your workers.

By improving site efficiencies and ensuring health and safety, we protect your peace of mind – so you can focus on delivering projects on time and within budget, with no surprises.

IN UK CONSTRUCTION:

£800m

lost annually to theft due to security vulnerabilities

1000

injuries every week due to health and safety breaches

1/5

illnesses caused by work-related stress

10-50%

of project's total cost lost to delays

MOTIVATION

17.01 As high security experts, we dig deeper to understand your risks, operations, and priorities. With a human-led consultative approach, we build trusted partnerships, providing a single, regular point of contact invested in your project from day one.

AGILITY

17.02 Security is measured in seconds, not hours or days. We respond quickly and without delays, delivering personalised solutions that work to protect and optimise your site with precision, intuition and attentiveness.

VIGILANCE

17.03 Security isn't just about preventing threats – it's about enabling your business. And that requires more than just reactive service. By proactively monitoring your site's productivity, we help you run the safest, most efficient operations, protecting your momentum and ensuring predictable progress.

EXCELLENCE

17.04 We work with you to deliver the right solution at the right time, every time. We stand by our quality service guarantee – no vague promises, no hidden costs, no overselling. Just complete transparency, cost certainty, and clear communication that lets you focus on delivering your projects on time and within budget

Our optimising 4-point approach

18.01

Our consultants take the time to fully understand your site and its unique security needs to ensure the highest level of protection and optimisation.

We begin with a detailed on-site risk assessment, working directly with you to identify potential risks and address any concerns. Based on this, we develop and implement a bespoke security plan, backed by ongoing support from your dedicated account manager.

Monitoring software

Access control

BENEFITS 25.01

- | | | | |
|----|---|----|---|
| 01 | Monitor large areas without needing guards on the ground, reducing staffing costs. | 06 | Get real-time alerts when equipment is tampered with, eliminating risks before they escalate. |
| 02 | Keep your site covered around the clock , even in low light or remote locations. | 07 | Automate security tasks , like filtering false alarms, saving time and reducing human error. |
| 03 | Improve site and worker safety by blocking unauthorised access. | 08 | Stay compliant with security standards and regulations, keeping insurers happy and your site secure. |
| 04 | Detect threats instantly , pinpoint their cause, and take immediate action to prevent damage or loss. | | |
| 05 | Leverage powerful analytics to track site activity, spot patterns, and make data-driven decisions that keep your security tight and operations smooth. | | |

NDAA Section 889 Compliant

When it's crucial, we don't cut corners. Our NDAA Section 889-compliant technology ensures that no untrusted foreign components are used, providing you with secure, reliable solutions you can count on.

Kanadevia Inova_

Building an Energy Recovery Facility (ERF) comes with challenges—security shouldn’t be one of them. With two rapidly evolving sites in Walsall and Thameside, both facing unreliable power supply, Kanadevia Inova needed a flexible, all-seeing security solution that could keep pace with the project’s growth.

“MAVE has been integral to our security and surveillance installations across multiple projects. Their systems have performed reliably, and their team always delivers on time.”

RESULTS & BENEFITS

- + **Adaptive security approach:**
We deployed a mix of solar and mains-powered systems tailored to the site’s needs.
- + **Cost efficiency:**
Reusing existing infrastructure and switching to mains power at Thameside reduced long-term costs.
- + **Continuous protection:**
Our solutions ensured 24/7 surveillance and rapid response to potential security threats.
- + **Remote accessibility:**
Live footage at the fingertips of management, site personnel and emergency services improved site oversight.
- + **Time-lapse monitoring:**
Enabled project tracking and stakeholder updates through a dedicated portal.

SOLUTION

- 01 Time-lapse cameras
- 02 Hard-wired CCTV
- 03 Security integration
- 04 Leamore Lane expansion

Willmott Dixon_

Willmott Dixon’s new leisure centre project needed a robust security solution to protect the site through every stage of the build. With high-value items, including plant machinery and fuel storage, theft and vandalism were major risks. This added to the challenge that the site had a temporary generator with no power supply.

“The quality of the service at MAVE continues with open and honest negotiations to provide competitive costings. The quality of the equipment and the installation has always been to a high standard.

I look forward to continuing to work with MAVE on future projects and would not hesitate to recommend for all your security needs.”

RESULTS & BENEFITS

- + **Immediate security coverage:**
We provided instant, reliable protection when the site was at its most vulnerable, deterring theft and vandalism.
- + **Flexible deployment:**
Our solutions adapted to the site’s progress, from solar CCTV towers to permanent hard-wired systems.
- + **Continuous surveillance:**
Ensured 24/7 security coverage without interruptions, even during potential power failures.
- + **Cost-efficient and scalable:**
We reduced costs by utilising solar-powered solutions early on and transitioning to permanent infrastructure as needed.

SOLUTION

- 01 Solar-powered CCTV
- 02 Hard-wired CCTV
- 03 Battery backup
- 04 Continuous surveillance
